PRISM’s Out in Science Panel

PRISM (People at Rockefeller Identifying as Sexual Minorities) has assembled a fantastic group of openly LGBTQ+ science faculty to speak in a moderated panel discussion about the challenges and opportunities faced by LGBTQ+ scientists in academia. Topics to be explored include workplace climate, mentoring, role models, and personal/family life. Please join us! Everyone—LGBTQ+ people, partners, family, friends, allies, and colleagues—is welcome and encouraged to attend and join the conversation.

**Monday, August 1, 2016, Rockefeller University, New York City**
